

License Validation Overview

The *WOLF SPORTS* platform enhances competitor certification by introducing a mandatory license validation process. All competitors entered in an event must confirm that their licenses are current and free of suspensions since their initial entry submission.

How It Works:

- 24-48 hours before the event start date, each competitor will receive an SMS with a validation link.
- Competitors must confirm that their licenses remain valid and current at the time of the event.
- Until validation is completed, your entry progress will temporarily drop from 100%.

Important:

Failure to complete the verification process may result in event officials prohibiting you from commencing the event.
